www.pima.edu/logistics-cert

Program Details

A Logistics and Supply Chain Management Certificate gives you an introduction to logistics and transportation skills and principles, including inventory controls and warehouse management.

Outcomes

Upon successful completion of the Basic Logistics & Supply Chain Management Certificate program, you will be able to:

- Describe major logistics functions and activities.
- Differentiate logistics and supply chain management.
- Describe alternative ways to organize for supply chain management.
- Describe methods of inventory planning.
- Explain how technology has and continues to change logistics and supply chain management.
- Compare modes of transportation and related policies.
- Outline computer and supply chain security measures.
- Describe warehouse processes, systems and performance measures.
- Identify job skills basic to employment success.
- Communicate effectively in both oral and written forms for all business settings.

Career Options

Entry-level positions in logistics.

Prerequisites/Placement

Placement assessments needed: reading, writing and math.

Academic Options

Continue taking classes toward Pima's AAS in Logistics and Supply Chain Management.
